

JW IMAGE ROTATOR

di Paolo Franzese

Aggiornato **JW IMAGE ROTATOR** alla versione 3.16, assolutamente da utilizzare per veloci **slideshow flash multimediali**:

This text will be replaced

The JW Image Rotator (built with [Adobe's Flash](#)) enables you to show a couple of photos in sequence, with fluid transitions between them. It supports rotation of an RSS, XSPF or ASX [playlists](#) with JPG, GIF and PNG images, a wide range of [flashvars](#) (variables) for tweaking both behavior and appearance and an extensive [javascript API](#).

Download

You can download the imagerotator by clicking the button. It includes all the source files (Flash 8), in case you want to change anything. A list of previous versions can be found [below](#).

[» Download the Rotator now](#)
