

# Google Fonts WordPress Plugin

di Paolo Franzese

The screenshot shows the WordPress.org Plugin Directory page for the 'WP Google Fonts' plugin. The page layout includes a top navigation bar with 'WordPress.org' and 'Go' buttons, and a secondary navigation bar with links for 'Home', 'Showcase', 'Extend', 'About', 'Docs', 'Blog', 'Forums', 'Hosting', and a 'Download' button. The main heading is 'Plugin Directory'. On the left, there are navigation menus for 'Extend Home', 'Plugins', 'Themes', 'Mobile', 'News', 'Search Plugins', and 'Popular Tags'. The main content area features the plugin title 'WP Google Fonts', a brief description, and a 'Description' tab. The description text states that the plugin allows users to easily add fonts from the Google Font Directory to their WordPress theme. It also mentions that the plugin is the most popular font plugin on WordPress. The author is identified as Adrian Harfi. On the right side, there is a 'Download Version v1.8' button, followed by requirements for WordPress version (3.0.2 or higher), compatibility up to 3.0.5, and the last update date (2011-1-11). There is also an 'Average Rating' section showing 5 stars and 20 ratings. A 'Compatibility' section shows the plugin is compatible with WordPress 3.1 and Plugin v1.8. A note indicates that there is not enough data for user feedback.

Ho appena installato su [www.nostromatrimonio.it](http://www.nostromatrimonio.it) un plug in di Wordpres per la getione dei fonts con Google Font Directory.

Prime sensazioni? Ottimo Plug in che ti rende semplicissima l'integrazione di Google Font: [Google font wordpress plugin](#)

Si gestisce semplicemente nel box Appereance, accedendo alla lista dei font disponibili e con la possibilità di personalizzare l'effetto dei font sul sito.

Voi lo userete? Fatemi sapere...
